# Quick Start Guide

## PS110W/210W HelloDevice Pro Series

#### (2) Connect Wireless LAN network

Users must make sure that Wireless LAN access point(AP) is installed within working distance. The factory default "Operation mode" of "WiFi configuration" is "Connect to any" SSID if not specified. Users should enter valid SSID of their AP for the normal operation of the

PS110W/210W. When powered up, PS110W/210W automatically tries to connect to the AP specified in "Operation mode". For more details, refer to the user manual from CD or Sena web site at www.sena.com

③ Connect serial device

### Installation

Using Terminal emulator such as a Hyper Terminal, users can configure network setting such as a "IP configuration". After configuring network setting, users can remotely configure details of the PS110W/210W using web interface or HelloDevice Manager via network.
